

Drive: Master Efficient Delivery Operations

Now more than ever, restaurant operators need more options to service guests safely. Online ordering, curbside pickup, takeout, and delivery are increasingly the top choices for customers to choose how and where they want to receive their food orders.

What is HungerRush Drive?

- Drive allows managers to view and track driver delivery progress through the HungerRush reporting and management HUB
- Drive allows drivers to get destination information for each order and mark each order as delivered through a custom mobile app

Delivery Management, Simplified

Monitor your delivery orders easily and set customer expectations for delivery.

- Own your delivery operations
- Onboarding is fast and easy
- Know where your active drivers are going and returning
- Gain more repeat business with better customer engagement
- Optimize your operations with detailed metrics on your active drivers

HungerRush Drive helps restaurant operators monitor their delivery orders and set customer expectations for delivery.

Detailed Delivery Insights at Your Fingertips

Within the HungerRush management HUB, Drive provides operators full visibility into their in-house delivery program.

- Identify active drivers' trip route
- View all late orders
- View past trips by date, driver and order number
- Easily view where your active driver is going, and time order was delivered
- Improve efficiencies with detailed reporting on delivery orders, staging time, driver delivery details, mileage, and compensation and delivery costs.
- Be more data-driven with metrics and order color-coded order identifiers, that show order, dispatch, delivery and return time for active orders

Power Your Drivers

Increase efficiency with performance data. Drivers have a custom app to view trip information that is fully integrated from your reporting and management HUB.

- Drivers see destination information for all orders on their trip through our integrated Drive App
- After dropping off each order, the order can is marked "Delivered" which stops the clock
- Take control of your operations with easily configurable settings in your reporting and management HUB
